

# IMP LOGISTICS CAPABILITIES IN SERBIA

Serbia is home to more than 7 million people, and is a potential Eastern Europe growth leader in the clinical trial market. Serbia has a diverse ethnic population in a promising pool of clinical trial participants, a centralized healthcare system, and many English-speaking professionals in the healthcare and clinical trial professions. Healthcare providers deliver high quality clinical trial data derived under GxP guidelines and can facilitate shorter study timelines.

- This location opened in 2017 as the latest addition to the IMP portfolio.
- Located in New Belgrade, in the Serbian capital.
- National healthcare system provides universal coverage.
- Pharmaceutical license in place.
- Location allows for delivery to sites within 24 hours of customs clearance.
- Large quantities of investigational product (IP) and non-investigational medicinal product can be stored in the depot to handle peak enrollment needs and ensure drug availability.
- Services include regulatory support; import/export permit; customs clearance coordination; storage in ambient and cold temperature zones; local distribution and logistics; comparator sourcing; equipment purchase/lease; and collection of returned IP and certified destruction.
- Overall storage capacity of 350 m<sup>3</sup>.

## SERBIA AT A GLANCE:

- International Council for Harmonisation (ICH)-good clinical practice (GCP)-compliant clinical trial ecosystem.
- Typical clinical trial approval application timelines of 60 days.
- Parallel applications to ethics committees and ministry of health.
- Cost advantages compared to Western Europe, US, and Asia.
- Pharmaceutical industry is a government priority for economic growth.
- Import and export licensing ensures safety, transparency, and minimal risk for clinical trials.

Ambient (+15 - +25°C)		2 - 8°C
