

# Building a course

## Embeddable items

You can embed anything into your course that has a secure html5 output (https://) Here are some examples of tools that might be of interest:

See [Embedding interactive resources.](#)

- [H5P](#) – Create a range of interactive activities.
- [Talks](#) – Create a conversation with animated talking heads.
- [Inklewriter](#) – Create an interactive story.
- [Twine](#) – Create branching scenarios for decision-making.
- [Geogebra](#) – Create manipulable graphical representations and mathematical relationships.
- [Padlet](#) and/or [Twiddla](#)– Give learners a blank canvas to collaborate.
- [Quizlet](#) – Create sets of flashcards that can be used in different game options.
- [Infogram](#) – Create interactive charts, graphs, and infographic posters.

## Activities

Adding an activity into your course is a great way to allow learners to see if they've understood a topic they've been learning about, or to explore a concept in more depth.

See [Create an activity.](#)

# Building a course

## Images and infographics

Adding images and infographic to your courses can make them more engaging and help to break up the text.

There are many free infographic tools on the web you can use, such as *Google Charts* or *Canva*, and, if you haven't got your own images to use you there are lots of photo libraries online you can subscribe to, or you can use the free Google image search and filter it for reuse.

See [Add an image or slideshow to a unit.](#)

## Videos

Adding video content into your course in addition to, or instead of, text can make the course more engaging. Videos can simplify learning that may be difficult to describe using just words, for example a video may be useful to demonstrate how to complete a specific task or procedure.

You can either source pre-existing videos, or record and add your own videos. Videos need to be uploaded to *YouTube* or *Vimeo* then embedded into iQualify.

Be sure you have the rights to use any video you embed into your course.

See [Adding a video.](#)
